

SWISS ENERGY
By Dr. FREI®

Made in Switzerland!

SWISS INNOVATION IN BIOENGINEERING!

4TH GENERATION FACE MASK!
"SECOND" SKIN!

- DEEP PENETRATION OF ACTIVE INGREDIENTS INTO THE SKIN
- VISIBLE INSTANT EFFECT
- "SECOND SKIN" - GREAT FIT
- EFFECTIVE FOR FAT-SOLUBLE AND FOR WATER-SOLUBLE INGREDIENTS
- SUITABLE FOR ALL SKIN TYPES

TYPES OF MASKS, WHAT ARE THEY?

There are several types of masks, depending on the basis

1ST GENERATION MASKS: NON-WOVEN FIBER

Non-woven fiber is an inexpensive material that does not spread well over the face and does not adhere well to the skin. Masks based on such fiber are actually thick wipes. They possess the lowest conductivity of useful ingredients and has the lowest efficiency.

2ND GENERATION MASKS: COTTON, BAMBOO

Cotton, bamboo is a thinner fabric base. It is slightly better than non-woven fiber. Has hypoallergenic properties.

3RD GENERATION MASKS: HYDROGEL

A **hydrogel mask** is a combination of gel and tissue. Unlike tissue masks, it adheres more closely to the skin and has the best conductivity of the ingredients. Hydrogel masks look thicker and more transparent.

MASKS OF THE LAST 4TH GENERATION!

BIO-CELLULOSE

BACTERIAL PRODUCT OF BIOENGINEERING!

Bio-cellulose is the most modern material specially designed for medical use in the treatment of burns and wound surfaces.

Due to its unique properties Biocellulose has been used in the production of cosmetic masks for the face of a new generation!

SWISS ENERGY COSMETIC MASK

Bio-cellulose based on 100% natural coconut juice

100% Natural

Made in Switzerland!

MANUFACTURING PROCESS OF BIO-CELLULOSE SWISS ENERGY MASK

- Coconut juice extraction**

1 STEP
- Adding a special strain of bacteria.**
A special strain of Acetobacter bacteria Xylinum used to grow bio-cellulose. This strain ferments coconut juice.

2 STEP
- Cultivation and extraction.**
Cultivation takes place at least 10 days in a special bioreactor. As a result, bio cellulose material is formed. Subsequently, this material is extracted.

3 STEP
- Pasteurization.**
The material is sterilized by pasteurization. After that process, bio-cellulose does not contain bacteria.

4 STEP
- Formation and saturation of mask with active ingredients.**
Bio-cellulose sheets are cut and shaped into a mask.
The mask is saturated with active ingredients and then goes to packaging.

5 STEP

UNIQUE PROPERTIES OF BIO-CELLULOSE MASK

- 1 ABSORBS AND HOLDS MOISTURE IN 100 TIMES MORE THAN OWN WEIGHTS**

The diameter of biocellulose fibers is 2-100 nanometers. It is much thinner than a human hair.

Such fiber is capable of absorbing and retaining an amount of moisture that is 100 times more than its own weight. It's at 10 times more than in fabric and paper mask.
- 2 DEEP PENETRATION OF ACTIVE INGREDIENTS INTO THE SKIN**

Bio-cellulose masks do not dry out during application. Throughout procedures they give to the skin all contained ingredients.
- 3 INSTANT VISIBLE EFFECT**

Due to the large number of useful substances that penetrate even into the deep layers of skin, a pronounced effect of the application occurs immediately after applications.
- 4 "SECOND SKIN" - IS A GREAT FIT**

Superhydration allows the mask cling tightly to the skin and fully repeat its microrelief. It helps to open pores and strengthen its absorption of nutrients entities gently. This mask is often called "Your second skin".
- 5 EFFECTIVE FOR FAT-SOLUBLE AND FOR WATER-SOLUBLE INGREDIENTS**

It is possible to add various ingredients into the bio-cellulose mask, which remain active and has pronounced effect
- 6 SUITABLE FOR ALL SKIN TYPES**

The propensity of biocellulose to optimize skin moisture due to giving or receiving moisture, makes it most useful in cosmetic practice - it moisturizes dry skin and normalizes oily skin at the same time.

COMPARATIVE CHARACTERISTICS OF MASKS

Fit to skin	Penetration of the ingredients into deep layers of skin	Moisture absorption / optimization of skin moisture	Compatible with various ingredients	Sustainability / hypoallergenicity
Bio-cellulose	+++	+++	+++	+++
Hydrogel	++	+	+++	++
Cotton/ Bamboo	++	++	++	+++
Sheet masks	+	+	++	+

INTENSE ANTI-AGING MASK

Contains highly concentrated anti-aging complex of hyaluronic acid, essential oils, herbal extracts and vitamins!

Made in Switzerland!

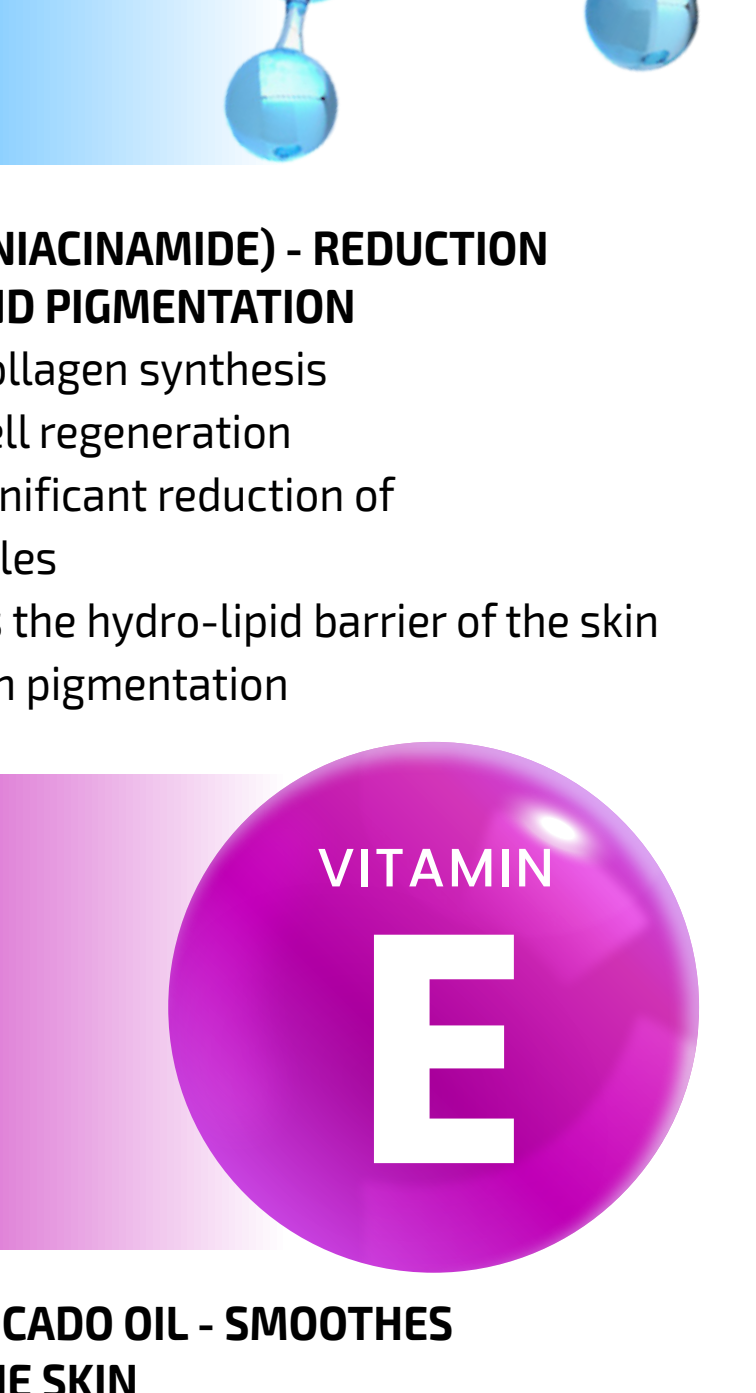

Composition:

- Hyaluronic acid**
- Vitamins E and B3**
- Joboba and Avocado Oil**
- Swiss herbs extracts:** chamomile, arnica, yarrow, gentian, wormwood.

HYALURONIC ACID - FOR ELASTICITY AND ELASTICITY

- Intensively moisturizes and softens the skin.
- Increases elasticity, density, firmness of the skin.
- Has an antioxidant effect, prevents oxidative stress of cells.
- Smooths wrinkles.
- Promotes the synthesis of collagen and elastin.
- Stimulates the regeneration of skin cells and promotes its regeneration.
- Slows down the processes of premature aging.

VITAMIN B3 (NICotinAMIDE) - REDUCTION WRINKLES AND PIGMENTATION

- Promotes collagen synthesis
- Enhances cell regeneration
- Provides significant reduction of mimic wrinkles
- Strengthens the hydro-lipid barrier of the skin
- Reduces skin pigmentation

VITAMIN E - DECREASING OF SKIN DRYNESS

- Slows down the skin aging process
- Smooths mimic wrinkles
- Gives skin elasticity
- Reducing skin flaking
- Normalizes lipid balance

JOJOBA AND AVOCADO OIL - SMOOTHES AND TIGHTEN THE SKIN

- Softens and moisturizes the skin
- Prevents premature aging
- Smooths and tightens the skin
- Stimulates the process of skin regeneration
- Protects the skin from harmful environment effects
- Normalizes metabolic processes
- Relieves skin irritation and tension

SWISS HERBS EXTRACTS - SOURCE OF NATURAL VITAMINS

- Provides soothing and softening
- Cleanse and tone the skin
- Smoothen skin texture
- Helps to relieve facial puffiness
- Helps improve complexion and remove age spots

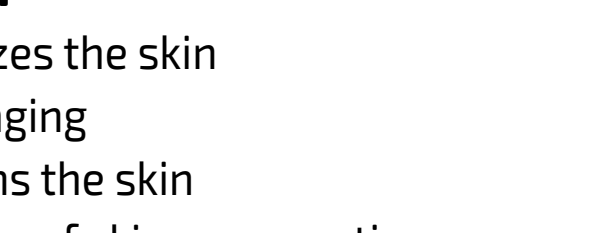

SPA-procedure effect!

- Helps to reduce the depth of wrinkles
- Tightens the contour of the face
- Reduces age spots and marks of hyperpigmentation
- Prevents dry skin
- Smooths and improves skin texture

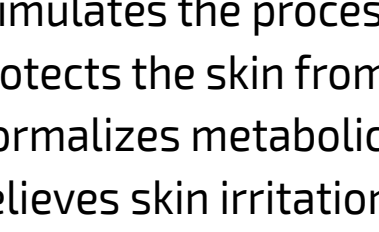

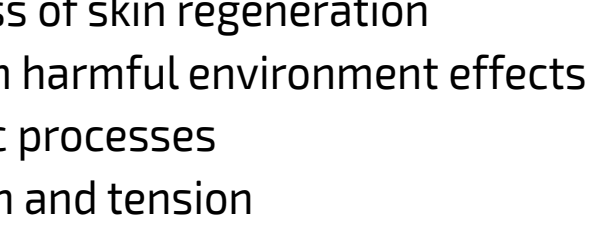

The result is more youthful and radiant complexion!
